Project Management and Implementation Unit**

**REQUEST FOR EXPRESSION OF INTEREST**

No.	Position	Duty station	Duration*
1	Project Procurement Assistant	PMU-MOWRAM	2 years

\*Annual contract renewal shall be based on performance evaluation.

**Background:**

The Ministry of Water Resources and Meteorology (MOWRAM) is preparing an Integrated Water Resources Management Project (IWRM) to be co-financed by Asian Development Bank (ADB) and Asian Infrastructure Investment Bank (AIIB). The IWRM will support the strengthening of the integrated water resources management (IWRM) to foster socioeconomic development in the project area in the river basin groups in Pursat and Battambang provinces covering rivers Pursat, Svay Daun Keo, MOUNG Russei, Sangker which are located in the southwest of the Tonle Sap Great Lake (TSL). The project will be aligned to impact: Cambodia's Water Resources Management (WRM) to adapt to the changing climate in sustainable ways to support social and economic growth whilst protecting the environment and enhancing ecosystems in the river basin groups covering Pursat, Svay Daunkeo, MOUNG Russei, and Sangker<sup>1</sup>. These river basin groups were assessed as highly vulnerable to climate change impacts. In the target basin groups, expected changes to precipitation and temperature patterns will result in more frequent short dry periods, which will increase water demands in various sectors in dry season. Substantial increases in wet season rainfalls are also expected, increasing the risk of both riverine and lowland flash flooding events. The potential for increased peak water levels at the TSL further exacerbates this risk.

The estimated budget of the IWRM project will be USD 198 Million with Asian development Bank (ADB) being the major lender but with substantial loan, grant co-financing from the Asian Infrastructure Investment Bank (AIIB) and Asian Development Fund (AFD). The project will be implemented through the following 3 Outputs: 1). Output 1: Planning, coordination, and climate change adaptation capacities of water resources management strengthened, Output 2: Water supply capacity increased and Output 3: Flood risks during wet season reduced. MOWRAM is now seeking a qualified candidate for the position of Procurement Assistant to provide technical support to the procurement officer in managing project procurement, contract management and procurement in Consulting Services Recruitment Notice (CSRN) which is a Consultant Management System or CMS (<http://cms.adb.org/>) created by the Asian Development Bank (ADB).

PMU-MOWRAM is seeking qualified candidates for the position of Project Procurement Assistant to be based in PMU but require extensive travel to project targeted provinces.

**Instructions for application:**

In submitting their expressions of interest, the interested candidates are kindly requested to provide their cover letter, updated curriculum vitae with recent photo, indicating their personal and technical skills, academic qualifications and experience in similar assignments along with the names of at least three (3) referees with contact information (e-mail, telephone or fax numbers). The interested candidates can request detail ToR from address below or download from PMU-MOWRAM Link: [https://doc.nwrddmc-mowram.gov.kh/public/adb\\_aiib](https://doc.nwrddmc-mowram.gov.kh/public/adb_aiib)

Expressions of Interest must be submitted to the address below by email and followed by hard copies, no later than, October 07, 2025 (before 5:00 pm). Only short-listed candidates will be invited for interview and contract negotiation.

Project Management and Implementation Unit of Ministry of Water Resources and Meteorology, Building Chhor, Procurement office, MOWRAM #364, Preah Monivong Blvd, Sangkat Phsar Deumthkov, Khan Chamkarmon, Phnom Penh, Cambodia.
